

July 19, 2010 upgrade information.

This upgrade works to fix the final known issue in the upgrade that makes the live divergence potential text % not be removed from the current bar until sometime later.

This upgrade will also fix the last known issue of text not being seen on the right edge of the chart.

IMPORTANT: YOU MUST HAVE ALL NINJA TRADER AND TRADESTATION PLATFORM WINDOWS CLOSED PRIOR TO RUNNING THIS INSTALLATION FILE.

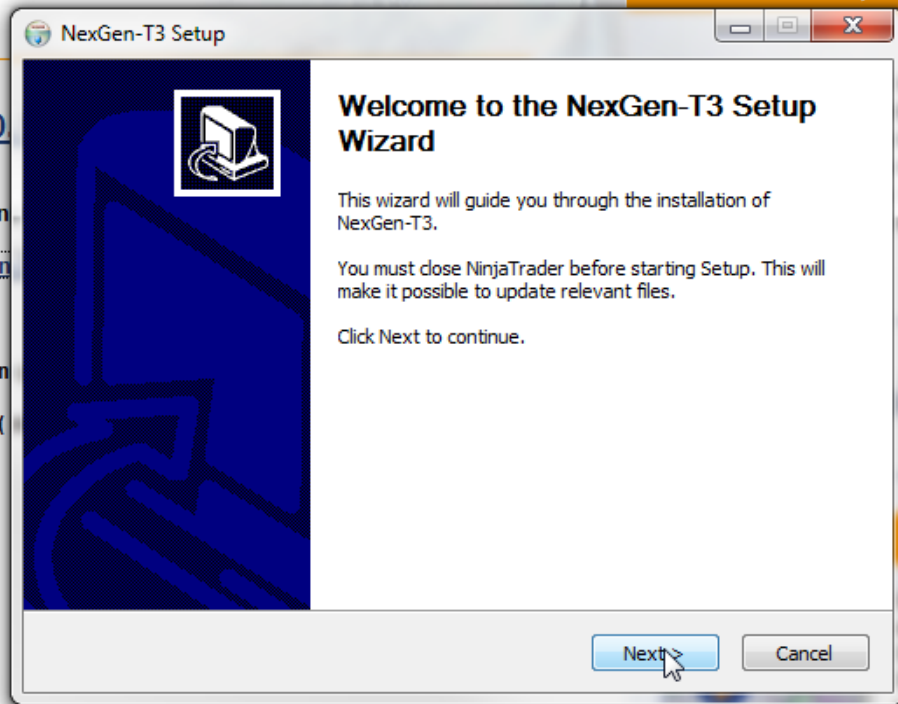

To run the upgrade click the file from the web and select run from <http://www.nexgent3.com/index.php?mod=resources>

The screenshot shows the 'Resources' section of the Nexgent3 website. The page lists several links related to the July 16, 2010 upgrade, including 'NEWS: MANDATORY upgrade available July 16, 2010. Please read these files', 'NINJA TRADER Version 7 Upgrade - click here to read instructions first', and 'Click here to open and run the T-3 Fibs ProTrader NINJA TRADER Version 7 upgrade'. A 'File Download - Security Warning' dialog box is overlaid on the page, asking 'Do you want to run or save this file?' for 'T3_NT7_Setup.exe' (Application, 426KB) from 'www.nexgent3.com'. The 'Run' button is highlighted with a mouse cursor. The background text on the website is partially obscured by the dialog box.

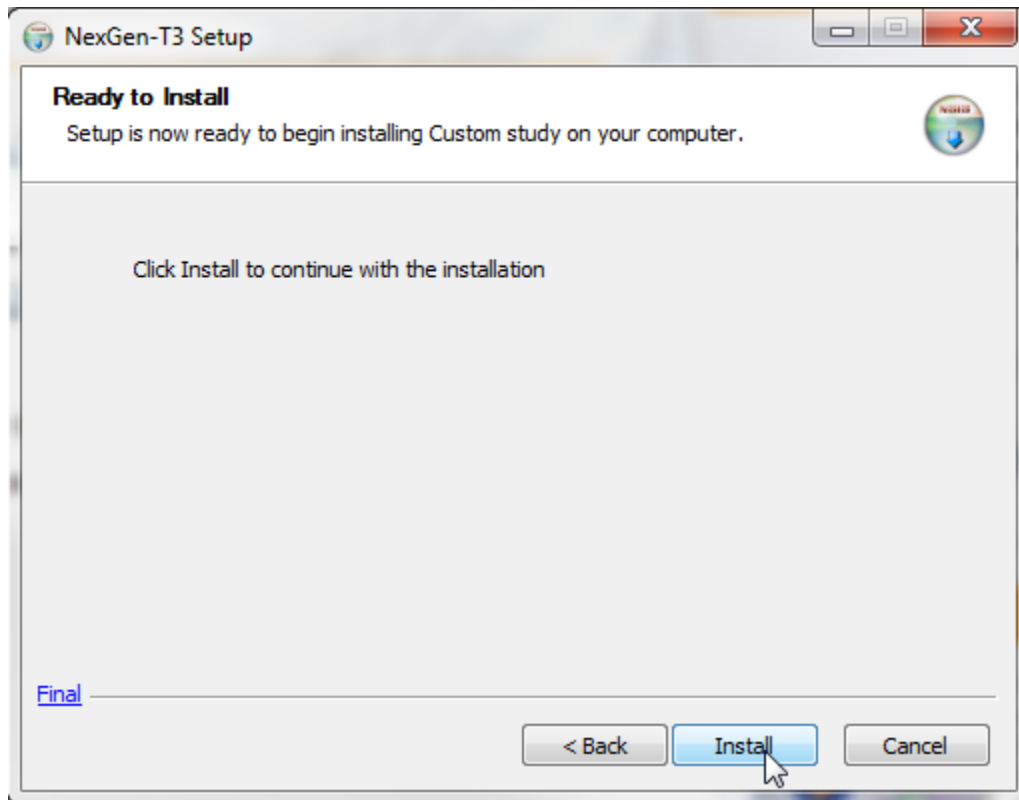

Then you will click run if asked again for security reasons.

The screenshot shows the same 'Resources' section of the Nexgent3 website. A 'Verifying T3_NT7_Setup.exe from www.nexgent3.com' dialog box is overlaid on the page, asking 'The publisher could not be verified. Are you sure you want to run this software?' for 'T3_NT7_Setup.exe' with a publisher of 'Unknown Publisher'. The 'Run' button is highlighted with a mouse cursor. The background text on the website is partially obscured by the dialog box.

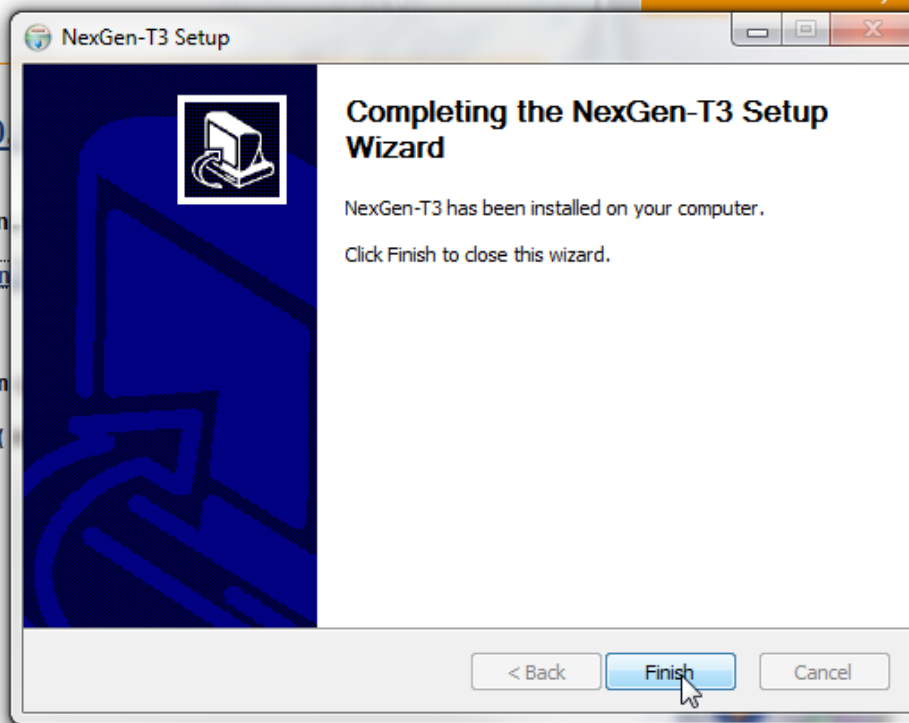

Then you will click NEXT on the installation wizard

Then you will click **INSTALL**

Then click FINISH

You have now completed the upgrade and may run your Ninja Trader.
